

# LE-300 Marine

## About:

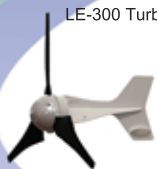

The trip has been planned to the smallest detail. No, not really!

The only thing that is certain is that we should start in Athens. From here we travel to Spain to make the boat properly ready.

Furthermore, the trip across the Atlantic, up the coast of USA. Maybe Greenland and Iceland before Norway. There is room for change. In the map below you can see where we are now and where we have been. The map is updated live as we sail.

## Equipment Used,

LE-300 Turbine

Marine Mast

DL-300 Charge Controller

Run/Stop Switch

## About the Trip

Trixi is a Bavaria 42 Cruiser, 2006 model. It has been in charter for Kiriacoulis in Greece for 6 seasons and the time has now come to implement a slightly longer journey before we come home with the boat again in 2012.
